I have been a happy XM customer for over a year. I was very excited when XM began offering Instant Traffic and Weather. I gladly pay my monthly fee to be able to listen to a variety of music and talk channels, many not available on traditional FM. I spend over 2 hours a day commuting to and from work, XM making this more enjoyable. Instant traffic helps me quickly determine the cause of any traffic conditions. I think it is wrong that I might be forced to switch to AM to find traffic conditions if HR 4026 is passed. I believe in fair competition and if the NAB had a better product then I would be getting my traffic reports from them. Please do not pass HR 4026 and kill a better product.
